IFSL Marlborough Multi-Cap Growth Fund Class A Units

(ISIN Income GB0005662787)

This Fund is managed by Investment Fund Services Limited (IFSL)

Objectives and Investment Policy

The aim of the Fund is to provide capital growth, that is, to increase the value of your investment, over a period of 5 or more years. The Fund aims to deliver greater returns than the FTSE All-Share Index over any 3 year period, after any charges have been taken out of the Fund. However, there is no certainty this will be achieved.

The Fund will invest at least 80% in the shares of companies and investment trusts listed on UK stock exchanges. This will include a range of small, medium and large companies.

Companies purchased will be those which the Manager considers to be the leading companies amongst their peers. These are typically companies the Manager believes have a superior business model, the potential to increase their market share or which are operating in markets where the Manager expects demand for the company's products or services to grow. The Manager may also take advantage of shorter term opportunities identified from time to time.

Following the same investment philosophy, the Fund may also invest in the shares of companies which are listed on overseas stock exchanges.

The Fund is actively managed, which means the Manager decides which investments to buy and sell and when.

The Fund will normally be fully invested save for an amount to enable ready settlement of liabilities (including redemption of shares) and efficient management of the Fund both generally and in relation to strategic objectives however may hold higher cash balances in extreme market conditions.

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors' as a way of dividing funds into broad groups with similar characteristics.

The Fund will be in the IA UK All Companies sector. You may want to assess the Fund's performance compared to the performance of this sector.

The performance target is the level of performance the Fund aims to deliver, however, there is no certainty this will be achieved. The FTSE All-Share Index has been chosen as the performance target as it has similar aims and objectives to the Fund.

The IFSL Marlborough Multi-Cap Growth Fund pays income. If you wish to receive this please tell us. If you do not wish to receive income we will reinvest it to buy more units for you.

You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio is used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 6 because its investments have experienced high volatility in the past. The Fund's volatility is affected by various risks, including:

- The Fund will be exposed to stock markets and market conditions can change

rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.

- The Fund invests mainly in the UK therefore investments will be vulnerable to sentiment in that market which may strongly affect the value of the Fund.

Risks which are not adequately captured by the risk indicator include:

- In certain market conditions some assets may be less predictable than usual. This may make it harder to sell at a desired price and/or in a timely manner.

- In extreme market conditions redemptions in the underlying funds or the Fund itself may be deferred or suspended.

A more detailed description of the risks that apply to this Fund can be found in the Fund's prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses for the year ending 20/03/2022. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units in another collective investment undertaking.

For more information about charges, please see Section 15 of the Fund's Prospectus, which is available at www.ifslfunds.com.
