

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Marlborough Extra Income Fund Class A Units

(ISIN Income GB0005662894)

This Fund is managed by Marlborough Fund Managers Ltd

Objectives and Investment Policy

The aim of the Fund is to pay an income in excess of that of the FTSE All Share Index over any 3 year period whilst taking less risk, after any charges have been taken out of the Fund. The Fund also aims to deliver capital growth, that is to increase the value of your investment, over a period of 5 or more years.

The Investment Manager will aim to maintain volatility of the Fund (a measure of the size of short term changes in value) below 80% of the volatility of the FTSE All Share Index over any three year period.

The Fund will invest between 70% and 85% in the shares of companies and investment trusts.

It will also invest up to 30% in bonds, which are loans issued by companies and other institutions. Bonds will typically be investment grade, which are issued by entities that have a high capacity to repay the debt, but it may occasionally hold sub-investment grade bonds as a result of changes to existing holdings.

At least 80% of the Fund will be invested in the shares of companies incorporated or headquartered in the UK and bonds denominated in GBP.

The Fund is actively managed, which means the manager decides which investments to buy and sell and when. The fund will invest in a range of assets that combined are aimed at achieving the objective. The Investment Manager will look to invest in companies that are well placed to benefit from current or future trends in their market environment, that exhibit some competitive advantage and employ management which are effective custodians of shareholder funds.

The Fund may also invest in companies which are listed on overseas stock

exchanges, other securities which offer returns linked to the company performance, such as warrants, preference shares and convertible bonds, as well as unquoted companies and other funds.

The Fund will normally be fully invested save for an amount to enable ready settlement of liabilities (including redemption of shares) and efficient management of the Fund both generally and in relation to strategic objectives however may hold higher cash balances in extreme market conditions.

We have chosen a performance target for the fund, which is to pay an income in excess of that of the FTSE All Share Index over any three year accounting period whilst taking less risk. We have chosen this as it is a reasonable reflection of what can be achieved by a fund investing in these markets and asset classes, without taking more risk than a portfolio invested only in equities.

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors' as a way of dividing funds into broad groups with similar characteristics.

The Fund will be in the IA Mixed Investment 40-85% Shares sector. You may want to assess the Fund's performance compared to the performance of this sector.

The Fund pays income. If you wish to receive this please tell us. If you do not wish to receive income we will reinvest it to buy more units for you.

You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio is used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 5 because its investments have experienced moderate to high volatility in the past. The Fund's volatility is affected by various risks, including:

- The Fund will be exposed to stock markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.
- The Fund has exposure to bonds, the prices of which will be impacted by factors including; changes in interest rates, inflation expectations and perceived credit

quality.

- When interest rates rise, bond values generally fall. This risk is generally greater for longer term bonds and for bonds with higher credit quality.

- The Fund invests mainly in the UK therefore investments will be vulnerable to sentiment in that market which may strongly affect the value of the Fund.

- In certain market conditions some assets may be less predictable than usual. This may make it harder to sell at a desired price and/or in a timely manner.

Risks which are not adequately captured by the risk indicator include:

- Bonds that produce a higher level of income carry greater risk that the issuer will not be able to pay the income or repay the capital at maturity.

- All or part of the fees and expenses may be charged to the capital of the Fund rather than being deducted from income. Future capital growth may be constrained as a result of this.

A more detailed description of the risks that apply to this Fund can be found in the Fund's prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses for the year ending 20/04/2020. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units in another collective investment undertaking.

For more information about charges, please see Section 13 of the Fund's Prospectus, which is available at www.marlbroughfunds.com.

One-off charges taken before or after you invest

Entry Charge	5.00%
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over each year

Ongoing Charges	1.63%
-----------------	-------

Charges taken from the fund under certain conditions

Performance Fee	None
-----------------	------

Past Performance

Historic performance to 31 December 2019

Past performance is not a guide to future returns.

Performance figures are calculated in Sterling on a bid price basis and include net reinvested income. They include the annual management charge and all other Fund expenses but do not include the entry charge.

The Fund was launched on 1 August 1995.

This Unit Class was launched on 1 August 1995.

Benchmark: FTSE AllSh TR GBP.
