Capital is at risk. The value and income from investments can go down as well as up and are not guaranteed. An investor may get back significantly less than they invest. Past performance is not a reliable indicator of current or future performance and should not be the sole factor considered when selecting funds. The Fund will be exposed to stock markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events. The Fund invests in smaller companies which are typically riskier than larger, more established companies. Difficulty in trading may arise, resulting in a negative impact on your investment. The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of your investment. The Fund invests mainly in The technology sector therefore investments will be vulnerable to sentiment in that sector. The Fund may therefore be more volatile than more diversified Funds. In certain market conditions some assets may be less predictable than usual. This may make it harder to sell at a desired price and/or in a timely manner. In extreme market conditions redemptions in the underlying funds or the Fund itself may be deferred or suspended. From 30 April 2022, the Ongoing Charge calculation has been extended to include, where relevant, charges incurred by closed-ended vehicles such as investment trusts. This document is provided for general information purposes only and is not personal advice to anyone to invest in any fund or product.

The Key Investor Information Documents and the Prospectuses for all funds are available, in English, free of charge and can be obtained directly using the contact details in the Group Details section.
