Capital is at risk. The value and income from investments can go down as well as up and are not guaranteed. An investor may get back significantly less than they invest. Past performance is not a reliable indicator of current or future performance and should not be the sole factor considered when selecting funds. The Fund will be exposed to stock markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events. The Fund has exposure to bonds, the prices of which will be impacted by factors including: changes in interest rates, inflation expectations and perceived credit quality. When interest rates rise, bond values generally fall. This risk is generally greater for longer term bonds and for bonds with perceived lower credit quality. The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of your investment. In certain market conditions some assets may be less predictable than usual. This may make it harder to sell at a desired price and/or in a timely manner. In extreme market conditions redemptions in the underlying funds or the Fund itself may be deferred or suspended. The Fund may invest a large part of its assets in other funds for which investment decisions are made independently of the Fund. If these Investment Managers perform poorly, the value of your investment is likely to be adversely affected. Investment in other funds may also lead to duplication of fees and commissions. Risks which are not adequately captured by the risk indicator include: The Fund may acquire unregulated collective investment schemes which carry greater risk as they may not be under the regulation of a competent regulatory authority. Dividends paid by companies are not guaranteed and can be cancelled, which may impact the Fund's ability to deliver an income to investors. From 30 April 2022, the Ongoing Charge calculation has been extended to include, where relevant, charges incurred by closed-ended vehicles such as investment trusts. This document is provided for general information purposes only and is not personal advice to anyone to invest in any fund or product.

The Key Investor Information Documents and the Prospectuses for all funds are available, in English, free of charge and can be obtained directly using the contact details below.
