Capital is at risk. The value and income from investments can go down as well as up and are not guaranteed. An investor may get back significantly less than they invest. Past performance is not a reliable indicator of current or future performance and should not be the sole factor considered when selecting funds. The Fund will be exposed to stock markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events. The Fund has exposure to bonds, the prices of which will be impacted by factors including; changes in interest rates, inflation expectations and perceived credit quality. When interest rates rise, bond values generally fall. This risk is generally greater for longer term bonds and for bonds with perceived lower credit quality. The Fund invests mainly in the UK therefore investments will be vulnerable to sentiment in that market which may strongly affect the value of the Fund. In certain market conditions some assets may be less predictable than usual. This may make it harder to sell at a desired price and/or in a timely manner. In extreme market conditions redemptions in the underlying funds or the Fund itself may be deferred or suspended. Risks which are not adequately captured by the risk indicator include: Dividends paid by companies are not guaranteed and can be cancelled, which may impact the Fund's ability to deliver an income to investors. Bonds that produce a higher level of income carry greater risk that the issuer will not be able to pay the income or repay the capital at maturity. All or part of the fees and expenses may be charged to the capital of the Fund rather than being deducted from income. Future capital growth may be constrained as a result of this. From 30 April 2022, the Ongoing Charge calculation has been extended to include, where relevant, charges incurred by closed-ended vehicles such as investment trusts. This document is provided for general information purposes only and is not personal advice to anyone to invest in any fund or product.

The Key Investor Information Documents and the Prospectuses for all funds are available, in English, free of charge and can be obtained directly using the contact details in the Group Details section. They can also be downloaded from [www.marlboroughfunds.com](http://www.marlboroughfunds.com). An investor must always read these before investing.
