# IFSL Marlborough European Special Situations Fund Class P Units

(ISIN Income GB00B90VHJ34)

This Fund is managed by Investment Fund Services Limited (IFSL)

## Objectives and Investment Policy

The aim of the Fund is to provide capital growth, that is, to increase the value of your investment, over a minimum of 5 years.

At least 80% of the Fund will be invested in the shares of companies listed on European stock markets (excluding the UK). Of this, up to 90% will be in smaller companies. The Investment Manager defines smaller companies as companies in the bottom 20% of the market cap, meaning the 20% smallest listed companies by size. The remainder will be in Mid and Large cap companies.

The Fund is actively managed, which means the investment manager decides which investments to buy or sell and when.

The Fund may also invest in other types of security which are linked to the performance of a company, such as; investment grade bonds, which are loans typically issued by companies and governments, where the issuer has a higher capacity to repay the debt; bonds which may be converted into shares (known as convertible bonds); and preference shares. A small amount may be held in UK companies to allow for changes which may be made to existing investments, for example following a restructure.

In addition, the Fund may invest in other funds (including investment trusts) which offer exposure to European companies and from time to time, may hold a small amount in investment grade bonds.

The Fund will normally hold an amount of cash to enable ready settlement of

liabilities and efficient management of the Fund both generally and in relation to strategic objectives however may hold higher cash balances in certain circumstances, such as volatile market conditions.

The Fund may also hold money market instruments, a type of short-term loan, and funds that invest in these instruments as an alternative to holding cash.

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors', as a way of dividing funds into broad groups with similar characteristics.

The Fund's investment policy puts it in the IA Europe Excluding UK sector. You may want to assess the Fund's performance compared to the performance of this sector.

The IFSL Marlborough European Special Situations Fund pays income. If you wish to receive this please tell us. If you do not want to receive income we will reinvest it to buy more units for you.

You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 10 years.

## Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio is used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 6 because its investments have experienced high volatility in the past. The Fund's volatility is affected by various risks, including:

- The Fund will be exposed to stock markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.

- The Fund will be exposed to smaller companies which are typically riskier than

larger, more established companies. Difficulty in trading may arise, resulting in a negative impact on your investment. Shares in smaller companies may be harder to sell at a desired price and/or in a timely manner, especially in difficult market conditions.

- The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of your investment.

Risks which are not adequately captured by the risk indicator include:

- In certain market conditions some assets may be less predictable than usual. This may make it harder to sell at a desired price and/or in a timely manner.

- In extreme market conditions redemptions in the underlying funds or the Fund itself may be deferred or suspended.

A more detailed description of the risks that apply to this Fund can be found in the Fund's prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses for the year ending 10/03/2022. From 30 April 2021, the Ongoing Charge calculation has been extended to include, where relevant, charges incurred by closed-ended vehicles such as investment trusts. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units in another collective investment undertaking.

For more information about charges, please see Section 6 of the Fund's Prospectus, which is available at [www.ifsfunds.com](http://www.ifsfunds.com).
