

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

IFSL

Fund Services

IFSL Signia Sovereign Fund USD Hedged

A Sub-fund of the IFSL Signia OEIC (ISIN Accumulation: GB00BKY5HQ52)

This Fund is managed by Investment Fund Services Limited (IFSL)

Objectives and Investment Policy

The aim of the Fund is to increase the value of your investment by more than 1% above cash a year, net of fees, over any 3 year period. Cash is measured by the Bank of England's interest rate benchmark, SONIA.

The increased value comes from a combination of income, which is money paid out of investments such as interest from bonds and dividends from ETFs, and capital growth, which is profit on investments held. There is no certainty that the aim of the Fund will be achieved.

The Fund will be actively managed, which means the Investment Manager decides which investments to buy and sell, and when.

The Fund will invest at least 90% across the world in a mixture of: • Sovereign and supranational debt, types of bonds issued by governments and government-backed institutions; • Funds and ETFs which invest in sovereign and supranational debt; and • Cash, via liquidity funds, such as money market funds.

Bonds will be focused in investment grade bonds, where the issuer has a high and reliable capacity to repay the debt. Should an investment grade bond held drop to sub-investment grade, which can be more vulnerable to changing market conditions, the Fund will aim to dispose of this in an orderly manner.

The Fund will focus its exposure on low-risk, high-grade bonds. Credit rating agencies rate the credit quality of bonds on a scale from AAA to D. Your Fund will aim to have the average credit rating across the holdings at or above AA-, which is considered 'high grade'.

The Investment Manager considers economic and market conditions when deciding asset allocation. This is alongside a focus on analysis of the individual countries and bonds when investing directly, or when investing indirectly, analysis of the funds and ETFs, aiming to identify those that the Investment Manager believes will perform well

in their sector.

The Fund may also hold up to 10% in cash. This is to enable the ready settlement of liabilities, for the efficient management of the portfolio and in pursuit of the Fund's investment objective.

The Fund can use derivatives or forward transactions, which are instruments whose returns are linked to another asset, market or other variable factor, for efficient portfolio management purposes, including the reduction of risk related to currency exposure, known as currency hedging.

The performance benchmark is the level of performance the Investment Manager aims to deliver. However, returns will fluctuate, and it will not necessarily be achieved over every 3 year period.

The Fund is designed as an alternative investment solution for sterling cash deposits, therefore SONIA being the Bank of England's sterling overnight interest rate for cash deposits is the most appropriate and reputable target benchmark for investors in this Fund.

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors', as a way of dividing funds into broad groups with similar characteristics.

The Fund's investment policy puts it in the IA Global Government Bond sector. You may want to assess the Fund's performance compared to the performance of this sector.

Income is not distributed but is rolled up (accumulated) into the value of your investment.

You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio are used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 3 because its investments have experienced low to moderate volatility in the past. The Fund's volatility is affected by various risks, including:

- The Fund has exposure to bonds, the prices of which will be impacted by factors including; changes in interest rates, inflation expectations and perceived credit quality.
- When interest rates rise, bond values generally fall. This risk is generally greater for longer term bonds and for bonds with perceived lower credit quality.
- The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of your investment.

Risks which are not adequately captured by the risk indicator include:

- In certain market conditions some assets may be less predictable than usual. This

may make it harder to sell at a desired price and/or in a timely manner.

- In extreme market conditions redemptions in the underlying funds or the Fund itself may be deferred or suspended.
- The insolvency of any institution providing services, such as safekeeping of assets or holding investments with returns linked to financial contracts (known as derivatives), may expose the Fund to financial loss.
- The Fund may enter into various financial contracts (known as derivatives) in an attempt to protect the value of the Fund's assets, to reduce the costs of investing or for investment purposes. There is however a risk that the desired result may not be achieved or may result in gains or losses greater than the amount originally invested.
- Hedging (derivatives) transactions are taken out to reduce the exposure of this share class to movements in the valuation currency of the Fund but these will not completely eliminate exposure. Shareholders may therefore still be exposed to an element of currency exchange risk.
- The Fund's cash may be deposited with various financial institutions. The Fund may suffer a loss if these institutions fail to make its payments or become insolvent.

A more detailed description of the risks that apply to this Fund can be found in the Fund's prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses for the year ending 28/02/2023. This share class has benefited from expense funding whereby some of the charges outlined in the prospectus have been fully or partially funded. Without this expense funding it is anticipated the OCF would be higher and potentially to the extent of having a noticeable impact on the returns investors receive. When this expense funding ceases if the OCF is expected to increase by an amount greater than 5% of its current value, Investment Fund Services Limited will give investors 60 days' written notice. Charges may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units in another collective investment undertaking.

For more information about charges, please see Sections 23 - 25 of the Fund's Prospectus, which is available at www.ifslfunds.com.

One-off charges taken before or after you invest

Entry Charge	0.00%
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over each year

Ongoing Charges	0.64%
-----------------	-------

Charges taken from the fund under certain conditions

Performance Fee	None
-----------------	------

Past Performance

Historic performance to 31 December 2022

	2018	2019	2020	2021	2022
■ Fund	-	-	-	-	-2.6
■ Benchmark	-	-	-	-	1.7

Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up.

Performance returns are based on the net asset value with distributable income reinvested and takes account of all ongoing charges, but not entry and exit charges. The past performance of this share class is calculated in GBP.

The Fund was launched on 30 October 2020.

This share class was launched on 07 April 2021.

Benchmark: Prior to 16/12/2022 the comparator benchmark of the Fund was SONIA +1%. As of 16/12/2022 the comparator benchmark of the Fund is the IA Government Global Bond sector.
