

Non-UCITS retail scheme Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

IFSL

Fund Services

IFSL Marlborough Conservative Fund Class P Shares

A Sub-fund of the IFSL Marlborough Multi-Asset OEIC (ISIN Income GB00BN2RPM61, Accumulation GB00BN2RPL54)

This Fund is managed by Investment Fund Services Limited (IFSL)

Objectives and Investment Policy

The aim of the Fund is to increase the value of your investment over any 5 year period, through a combination of capital growth, that is, profit on investments, and some income, that is, money paid out of an investment, such as interest from bonds or dividends from shares. The Fund aims to outperform the average of the IA Mixed Investment 0-35% Shares sector, after charges, over any 5 year period. However, there is no certainty this will be achieved.

At least 80% of the Fund will be invested in other funds, including exchange traded funds (which typically track an index) and investment trusts. This may include other funds operated by the Authorised Corporate Director or its associates. Through these investments, the Fund will be exposed to a range of asset classes, creating a low to medium risk portfolio. Between 0-35% of the Fund will be exposed to shares in companies, both UK and overseas, but typically this will be between 15-30%. At least 45% of the Fund will also be exposed to bonds, which are loans typically issued by companies and governments, and cash. This may include investment grade bonds, where the issuer has a higher capacity to repay the debt, as well as sub-investment grade bonds, which can be more vulnerable to changing market conditions but typically pay a higher rate of interest.

Through investing in funds, the Fund may also be exposed to other asset classes such as property, commodities (such as gold and oil), money market instruments, which are shorter term loans, cash and other permitted investments, such as warrants. Funds purchased may also have the ability to use derivatives (investments whose returns are linked to another asset, market or other variable factor) to varying degrees, including funds which aim to deliver positive returns in a range of market conditions, often referred to as absolute return funds.

The Fund may also invest in these asset classes directly (excluding property and commodities) up to a maximum of 20%.

The Fund is actively managed, which means the Investment Manager decides which investments to buy or sell and when. Investments will span a range of developed and emerging markets globally with no maximum or minimum exposure to any one market or geographical region. Decisions around asset allocation are based on the Investment Adviser's research process which considers the potential for loss as well as the overall return expectations for an asset class. The Fund may use derivatives or forward transactions whose returns are linked to exchange rates in order to reduce currency risk (also known as hedging), however, this is likely to be infrequent.

The performance benchmark is the level of performance the Fund aims to deliver after charges and with income reinvested however there is no certainty this will be achieved.

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors' as a way of dividing funds into broad groups with similar characteristics. This Fund aims to be in the top half of all funds included in the IA Mixed Investment 0-35% Shares sector.

The IFSL Marlborough Conservative Fund pays income. If you wish to receive this please tell us. If you do not want to receive income you will be given accumulation units which means income is invested back into the Fund and reflected in the price of your units.

You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio is used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 4 because its investments have experienced moderate volatility in the past. The Fund's volatility is affected by various risks, including:

- The Fund will be exposed to stock markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.
- The Fund has exposure to bonds, the prices of which will be impacted by factors including; changes in interest rates, inflation expectations and perceived credit quality.
- When interest rates rise, bond values generally fall. This risk is generally greater

for longer term bonds and for bonds with perceived lower credit quality.

- The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of your investment.

The Fund may invest a large part of its assets in other funds for which investment decisions are made independently of the Fund. If these Investment Managers perform poorly, the value of your investment is likely to be adversely affected. Investment in other funds may also lead to duplication of fees and commissions.

Risks which are not adequately captured by the risk indicator include:

- In certain market conditions some assets may be less predictable than usual. This may make it harder to sell at a desired price and/or in a timely manner.
- In extreme market conditions redemptions in the underlying funds or the Fund itself may be deferred or suspended.

Dividends paid by companies are not guaranteed and can be cancelled, which may impact the Fund's ability to deliver an income to investors.

A more detailed description of the risks that apply to this Fund can be found in the Fund's prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses for the year ending 31/12/2021. From 30 April 2021, the Ongoing Charge calculation has been extended to include, where relevant, charges incurred by closed-ended vehicles such as investment trusts. Charges may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units in another collective investment undertaking.

For more information about charges, please see Sections 20 - 22 of the Fund's Prospectus, which is available at www.ifslfunds.com.

One-off charges taken before or after you invest

Entry Charge	0.00%
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over each year

Ongoing Charges	1.14%
------------------------	-------

Charges taken from the fund under certain conditions

Performance Fee	None
------------------------	------

Past Performance

As the Fund has no performance data for one complete year, there is insufficient data to provide a useful indication of past performance.

The Fund was launched on 18 January 2021.

This Share Class was launched on 18 January 2021.
