Following this analysis and asset selection the Investment Manager will then use an investment selection process which consists of selecting assets that have a strong focus on Environmental, Social and Governance (“ESG”) considerations along with the potential to grow in value. The Fund aims to deliver growth from a higher risk level of return.

The Fund will have exposure to ESG focused investments through a broad range of asset classes and investments across different industries and geographical regions, however not all asset classes may be held at all times. This will include: • Between 55% and 85% in shares of companies. • Between 5% and 25% in bonds. • Up to 20% in investment trusts providing exposure to alternative assets such as, property and infrastructure.

Bonds, which are loans typically issued by companies, governments, and other institutions, may be either investment grade, where the issuer has a high and reliable capacity to repay the debt, or sub-investment grade, which can be more vulnerable to changing market conditions.

The Investment Manager applies their own ESG rating mechanism to the investment selection process to identify assets that look to benefit from changes within the economy whilst offering robust management of ESG risks and opportunities. This process involves detailed research and analysis using both investment expertise and independent data. The responsible investment process initially involves negative screening to avoid investing in companies that generate more than a defined percentage of revenue from the following activities: • Tobacco, gambling services and armaments (military weapons and equipment) and civilian firearms – maximum of 5% of revenue. • Pornography – maximum of 3% of revenue. • Predatory lending, cluster munitions and landmines – 0% of revenue. • Coal, unconventional oil or gas extraction (e.g. tar sands and shale), or coal power generation – maximum of 5% of revenue.

Following this analysis and asset selection the Investment Manager will then use an independent ESG ratings agency to verify their conclusions to ensure an overall high quality ESG rating for the Fund which can be independently verified.

Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years’ data is not available, simulated data based on a representative portfolio are used.

Past data may not be a reliable indicator of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 5 because its investments have experienced high volatility in the past. The Fund’s volatility is affected by various risks, including:

- The Fund will be exposed to stock markets and market conditions can change rapidly. Prices may move irrationally and be affected unpredictably by diverse factors, including political and economic events.
- The Fund has exposure to bonds, the prices of which will be impacted by factors including: changes in interest rates, inflation expectations and perceived credit quality. When interest rates rise, bond values generally fall. This risk is generally greater for lower term bonds and for bonds with perceived lower credit quality.
- The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of your investment.

Risks which are not adequately captured by the risk indicator include: The Fund has an ESG focus which may limit or exclude the Fund’s exposure to companies, industries, or sectors which are part of the Investment Manager’s responsible investment selection process. This may impact the Fund’s investment performance compared to other funds and may differ from an investor’s own view of responsible ESG selection.

The Fund invests in real estate investment trusts (REITs) and other companies or funds engaged in property investment, which involve risks above those associated with investing directly in property. REITs may be subject to lower strict regulation purposes than the Fund itself and may experience greater volatility than their underlying assets.

The Fund may be vulnerable to factors that particularly affect the infrastructure sector, for example natural disasters, operational disruption and national and local environmental laws.

- In certain market conditions some assets may be less predictable than usual. This may make it harder to sell at a desired price and/or in a timely manner. In extreme market conditions redemptions in the underlying funds or the Fund itself may be deferred or suspended.
- The insolvency of any institution providing services, such as safekeeping of assets or holding investments with returns linked to financial contracts (known as derivatives), may expose the Fund to financial loss.

The Fund may enter into various financial contracts (known as derivatives) in an attempt to protect the value of the Fund’s assets or to reduce the costs of investing, although this may not be achieved.

All or part of the fees and expenses may be charged to the capital of the Fund rather than being deducted from income. Future capital growth may be constrained as a result of this. A more detailed description of the risks that apply to this Fund can be found in the Fund’s prospectus.
Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses for the year ending 30/04/2023. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the non-UCITS retail scheme when buying or selling units in another collective investment undertaking.

For more information about charges, please see Section 7 of the Fund’s Prospectus, which is available at www.ifslfunds.com.
