Value assessment report

This report describes the value assessment we have carried out for the following funds (the Funds):

- IFSL CAF ESG Cautious Fund
- IFSL CAF ESG Growth Fund
- IFSL CAF ESG Income & Growth Fund
1. The Value Assessment Report

Dear Investors,

This report is the result of the annual value assessment that we have carried out for you. Investment Fund Services Ltd (IFSL) is the authorised fund management company (AFM) for the Funds covered by this report. As the AFM, we are responsible for operating the Funds in the interests of our investors. Producing this report is an important way in which we discharge that responsibility. We are also accountable to our regulator, the Financial Conduct Authority (FCA).

We carry out a value assessment at least yearly for each of our funds. The team who carry out the value assessments includes two independent non-executive directors. A part of this independent challenge is to ensure particular regard is given to investor outcomes. As Chair of our Board of Directors, I have responsibility to ensure we carry out these value assessments.

The purpose of the value assessment is to consider whether the payments that the prospectus allows to be taken from the Funds, are justified in the context of the overall value delivered to investors. After each assessment, we publish this report to provide you with our conclusions and explanations about its key aspects.

When carrying out the value assessment, we have been guided by three key considerations. These are:

- The rules of the FCA.
- Making the report meaningful for investors.
- The importance of measuring value and not just cost.

Each are now explained in more detail.

I. The rules of the FCA

These require us to consider certain minimum criteria. There are seven set by the FCA.

<table>
<thead>
<tr>
<th>FCA Value Assessment Criteria</th>
<th>Summary of FCA Value Assessment Criteria</th>
</tr>
</thead>
<tbody>
<tr>
<td>Performance</td>
<td>Are the funds performing against their investment objectives?</td>
</tr>
<tr>
<td>Comparable Market Rates</td>
<td>Are the funds priced similarly to competitors?</td>
</tr>
<tr>
<td>Comparable Services</td>
<td>Are funds priced reasonably compared to other products with similar investment strategies?</td>
</tr>
<tr>
<td>ACD Costs</td>
<td>Are fees charged to investors reasonable and appropriate?</td>
</tr>
<tr>
<td>Economies of Scale</td>
<td>Are economies of scale generated and passed on to investors?</td>
</tr>
<tr>
<td>Quality of Service</td>
<td>Does the range and quality of service offer value?</td>
</tr>
<tr>
<td>Classes of Units</td>
<td>Are investors in the cheapest available unit class based on their characteristics?</td>
</tr>
</tbody>
</table>
Each is considered under its own heading in the following pages.

We are not limited to the seven that are prescribed but to date we have found they are sufficiently broad to allow us to carry out the value assessment. We keep this under review.

II. Making the report meaningful for investors

We aim to provide an assessment that is meaningful for all investors. We recognise individuals will have their own reasons for holding the Funds and their own specific goals. We have been guided by the following considerations:

- The specific investment objectives as set out in the prospectus.
- The investment policies and strategies.
- Any relevant benchmarks, including any against which performance is measured.
- The fund’s target market (the types of investors who could be expected to consider buying it).

We have considered these factors as at 30 April 2023, not merely across a single year but particularly in relation to performance – across timescales which better reflect the periods over which investors could be expected to hold these Funds.

III. The difference between assessing value and simply measuring cost

We believe that the best value for investors does not necessarily mean simply the lowest costs.

As an example, all the Funds in this report are actively managed. This means the investment manager chooses which investments to make, based on their own research and processes. This approach can be expected to result in higher costs being taken from the Funds than for passive funds. Passive funds are where investments are chosen based on an index or because of the size of the company, for example, and not based on a decision by an investment manager. However, while we consider the higher costs as part of the value assessment, we will also look at other factors, such as the actual returns achieved for investors, which are net of these costs.

Nevertheless, we are clear that any value assessment includes an assessment of the controls over costs borne by the Funds.
In closing, I remind you that the value of your Fund can fall or rise and it can do so daily. The Funds are exposed to stock markets and market conditions can change rapidly resulting in volatile price movements and being affected unpredictably by diverse factors, including political and economic events. In addition, inflation will, over time, reduce the value of your investments in real terms.

We carried out our assessment with performance figures as at 30 April 2023. You can always find up to date performance figures on our [website](#) or from your adviser or platform.

I hope in turn you find this report of value. All of us at IFSL welcome any feedback on how to improve these reports for the future.

With my kind regards,

Guy Sears

Independent non-executive Chair of the Board
2. The characteristics of the Funds

When we described our approach above, we said we considered the objectives and investment policies. In this section we summarise these characteristics for each of the Funds. Under each fund name we set out the objective and the benchmark against which you can assess the performance of the Fund.

There can be three types of benchmark and these are explained below.

The benchmarks

- A 'target' benchmark is used to define a fund's target performance (or to trigger a payment from scheme property such as a performance fee).
- A 'comparator' benchmark is used as a performance comparator for a fund ('performance benchmark').
- A 'constraint' benchmark restricts the composition of a portfolio.

The latest version of the above information can always be read by looking at the Key Investor Information Document. These are available on our website at www.ifsfunds.com. They also set out the investment policy, which explains in more detail how each Fund aims to achieve its objective.
**IFSL CAF ESG Cautious Fund**

**Investment objective**

The aim of the Fund is to increase the value of an investment over a minimum of 5 years through a combination of capital growth - which is profit on investments held, and income received by the Fund - which is money paid out of investments, such as dividends from shares and interest from bonds. The Fund also aims to outperform, over any rolling 5 year period, inflation plus 1.5% per annum. Inflation is measured as the UK Consumer Prices Index for these purposes.

**Benchmarks**

Comparator - ARC Sterling Balanced Asset ACI  
Constraint - N/A  
Target - UK Consumer Price Index (UK CPI) +1.5% p.a.

**IFSL CAF ESG Growth Fund**

**Investment objective**

The aim of the Fund is to increase the value of an investment over a minimum of 5 years through a combination of capital growth - which is profit on investments held, and income received by the Fund - which is money paid out of investments, such as dividends from shares and interest from bonds. The Fund also aims to outperform, over any rolling 5 year period, inflation plus 4% per annum. Inflation is measured as the UK Consumer Prices Index for these purposes.

**Benchmarks**

Comparator - ARC Sterling Steady Growth ACI  
Constraint - N/A  
Target - UK Consumer Price Index (UK CPI) +4.0% p.a.
IFSL CAF ESG Income & Growth Fund

Investment objective

The aim of the Fund is to increase the value of an investment over a minimum of 5 years through a combination of capital growth – which is profit on investments held, and income received by the Fund - which is money paid out of investments, such as dividends from shares and interest from bonds. The Fund also aims to outperform, over any rolling 5 year period, inflation plus 3% per annum. Inflation is measured as the UK Consumer Prices Index for these purposes.

Benchmarks

Comparator - ARC Sterling Steady Growth ACI
Constraint - N/A
Target - UK Consumer Price Index (UK CPI) +3.0% p.a.
3. Range and quality of services

What have we considered?

In this section we have considered the first area of the value assessment. This covers the quality of service we provide and the quality of service provided by any person to which any aspect of the Funds' management has been delegated or who provides services to us.

How have we made our assessment?

We have reviewed and given consideration to the services delivered and how they affect investors in the Funds and the delivery of each Fund's objectives. We also give consideration to the quality of the service delivered by IFSL and each external provider.

We have considered, as we do for all value assessments, whether they have been managed within their investment restrictions and if there have been any operational errors or complaints. This is reviewed by Fund and by Share Class if more than one Share Class exists. There are no material issues which we consider affect our conclusions about quality of service in this assessment period.

We have reported under three subsections:

Services in relation to the required independent third parties - Depositary, Custodian and Auditor.

Other third parties - The Investment Manager and the Sponsor

In-house functions - Our own provision of services to the Funds

In this part of our assessment, if there are any material distinctions between the Funds or the share classes within the Funds, we will specify this.
Services in relation to required independent third parties

The following section considers the required independent third-party service providers: the Depositary, the Custodian and the Auditor.

The Depositary

The Depositary is an independent entity charged with various regulatory responsibilities to the Funds. It is a key part of the oversight of these Funds.

The Depositary is paid from the Fund it oversees directly under the terms of the prospectus. Its fees are shown in the statutory accounts.

As AFM we are responsible for selecting the Depositary, negotiating its fees and other commercial terms and for monitoring its performance and suitability on an ongoing basis.

In order to ensure we receive a good level of service we only work with a limited number of Depositaries at any one time. There are presently two across the entire range of funds for which we are the AFM. The Depositary for these Funds is HSBC Bank PLC.

We have assessed the Depositary based on a mix of criteria including but not limited to:

- size and reputation within the industry
- geographical relevance for the Funds’ strategies and investors
- service levels
- history of interactions
- resource and expertise
- costs and charges

Our interactions with them lead to constructive dialogue and challenge as we at IFSL work in collaboration with them to prioritise good outcomes for our fund investors.

The costs chargeable to the Funds by HSBC were last reviewed formally by us in the first quarter of 2023. We regularly check the fees paid to our service providers to ensure they deliver value when considered against the service we receive.
The Custodian

The Custodian is an independent entity responsible for holding the assets of the Funds. Again, this role is key in ensuring good outcomes for investors.

The Custodian is paid from these Funds directly under the terms of the prospectus. Its fees are shown in the statutory accounts. It is appointed by the Depositary but will be selected, and commercial terms will be negotiated and agreed, by us as the AFM.

Along with the Depositary, we review and monitor the performance of the Custodian and review the charges made to the Funds.

In order to ensure we receive a good level of service we only work with a very limited number of Custodians at any one time. There are presently two across the entire range of funds for which we are the AFM. The Custodian for these Funds is HSBC Bank PLC.

We have assessed the Custodian based on a mix of criteria including but not limited to:

• size and reputation within the industry
• geographical relevance for the Funds' strategies and investors
• service levels
• history of interactions
• resource and expertise
• costs and charges

We at IFSL work in collaboration with them to prioritise good outcomes for our investors.

We regularly check the fees paid and compare these against other service providers to ensure they deliver value when considered against the service we receive and the fees paid by other funds for which we are AFM. We last carried out a review of the costs chargeable by the Custodian, during the second quarter of 2022. This resulted in a lower fee being applied to the funds under management with IFSL.
The Auditor

The Auditor is an independent entity responsible for auditing the financial statements of the Funds. The Auditor is paid from these Funds directly under the terms of the prospectus. Its fees are shown in the statutory accounts.

It is selected and appointed by us, as AFM, and we are responsible for negotiating the commercial terms, including the audit fees they charge.

We have assessed the auditors based on a mix of criteria including but not limited to:

- size and reputation within the industry
- expertise, scale and involvement with regulatory and industry change
- appropriateness to overall business scale
- appropriateness for the range of funds for which we are AFM.

We regularly check the fees paid and compare these against other service providers to ensure they deliver value when considered against the service we receive and the fees achieved by other funds for which we are AFM. We have regular interaction with the Auditor and remain confident that the fee is fair based upon the service received, including having considered each of the factors above.
Other third parties - appointments and outsourcing

This section refers to the delegation of certain functions to, or the appointment of, an external entity. Such arrangements are not required by regulation but may be entered into at our discretion.

The Sponsor, Distributor and Co-Manufacturer

We have appointed CAF Financial Solutions Limited (CFSL) as the Sponsor, Distributor and Co-Manufacturer of the Funds. This means that they work with us to design, promote and distribute the Funds. CFSL receive a fee for their role, payable from the annual management charge taken under the terms of the prospectus.

We have assessed CFSL based on a mix of criteria including but not limited to their promotion and distribution of the Funds and the input they provide as they work with us to ensure the Funds remain viable and relevant to the investors in the Funds.

The Investment Manager

We have appointed abrdn Investment Management Limited (abrdn) to manage the investments within the Funds. The Investment Manager receives a fee for their role, payable from the annual management charge taken under the terms of the prospectus.

We have assessed the services of the Investment Managers based on a mix of criteria including but not limited to:

- resource and expertise
- investment research, which is funded by abrdn themselves and is not an additional charge to the Funds
- its control of transaction costs (which the Funds pay) and how trades are executed
- whether they have been managed within their investment restrictions
- a review of any operational errors or complaints
- the timeliness with which complete and accurate data is provided to us

Having regard to these factors and our oversight and governance more generally, we conclude that the charges taken for these services, were justified based on the overall value delivered to investors.

The results of our review of the services provided and the manner in which they were delivered, are discussed in more detail under the ‘Performance’ section.
In-house functions - the quality of our own services

**Governance and oversight**

We dedicate senior manager and board level resource to our governance structures, including Product Governance, Investment, Risk and other operational committees. Combined with our model of running most services in-house, we believe that this level of governance helps us to safeguard the best interests of investors.

As AFM, we are responsible for overseeing any party that provides services to our funds and agreeing commercial terms for those services. We continuously review our service providers to ensure they continue to meet the high standards we expect for our investors.

**Administration**

In the UK fund industry, it is not uncommon for an AFM to use third parties to carry out fund administration services. This may include dealing and settling purchases and sales of units in the funds, calculating the funds' dealing prices and maintaining the register of unit-holders in the funds.

We maintain our own systems and resources in order to carry these activities out ourselves. We do this so that we are able to retain specialist operational expertise and maintain transparency in our processes. This also means we can direct investment into our people and our technology in a cost effective manner, which we feel brings benefits to investors.

**Investor communications and relations with investors**

We have a dedicated investor support team and, with the exception of some printing and publication work, all communication with investors is conducted by in-house staff, who provide support and information to investors and their intermediaries. Working alongside our fund administration staff, this team benefit from technical training and specialist knowledge, enabling them to provide an efficient and responsive service for our investors.

**Additional competencies**

In addition to our in-house expertise we maintain close relationships with recognised specialist law firms, accountants, trade bodies and training providers to maintain an up-to-date understanding of legal and regulatory expectations and best practice.

**Conclusion**

Overall, we are satisfied with the quality of services provided to the Fund by third parties and in-house.
4. Performance

When assessing the value represented by the performance achieved for these Funds within the IFSL CAF Fund range over the past twelve months we have considered an in-depth package of information. This allows us to consider the performance having regard to the investment objective (and policy) of each Fund. A fund’s objective may envisage that success is to be measured over a period greater than a year. For example, it may say that the fund aims to grow your investment over a 5 year period. We bear such timescales in mind in forming our assessments of performance.

Within the above context, for each Fund, we consider the:

- comparative outcome relative to their benchmark
- volatility (a measure that considers how often, and by how much, the value of an investment goes up and down relative to its average or to a benchmark)
- performance relative to a range of industry standard risk adjusted measures of performance
- the investment management activities and strategies undertaken by the Investment Manager

The objectives for these Funds are set out in Section 2. Full information including the Funds objective and investment policy can be found in the Key Investor Information Document. These are available on our website at www.ifslfunds.com.

**IFSL CAF ESG Cautious Fund**

<table>
<thead>

<td>9.4%</td>
<td>-</td>
</tr>
</tbody>
</table>

*Data is cumulative returns running from the Fund’s launch date (16.05.22) to 30.04.23*

**Conclusion**

The Fund launched in May 2022, and we conclude it is too soon to assess your Fund’s performance against the recommended holding period of 5 years. We have therefore provided you with an overview of the Fund’s performance so far.

*cont’d*
The Fund’s target is to achieve inflation (measured by CPI) +1.5% which equates to 9.4% over the period since the Fund launched. It is currently tracking behind this with returns of -3.1%. Investors should be aware that the Fund launched in a difficult economic and market environment, during which inflation significantly increased. We note that the Fund will need to achieve strong positive returns above inflation over the next 4 years to achieve this target.

The Fund has satisfied its Environmental, Social and Governance ("ESG") commitments. It has also been rated ‘high’ and categorised as AA by MSCI, a leading independent index provider.

When compared to the ARC Sterling Balanced Asset ACI, (which is used to compare the Fund’s performance to other similar funds) it did not perform as well as the average manager who returned -1.4% over the same period. As we progress into the next period, we will closely monitor the performance and will engage with the Investment Manager as necessary.

### IFSL CAF ESG Growth Fund

*Data is cumulative returns running from the Fund’s launch date (16.05.22) to 30.04.23*

### Conclusion

The Fund launched in May 2022, and we conclude it is too soon to assess your Fund’s performance against the recommended holding period of 5 years. We have therefore provided you with an overview of the Fund’s performance so far.

The Fund’s target is to achieve inflation (measured by CPI) +4% which equates to 11.8% over the period since the Fund launched. It is currently tracking behind this with returns of 4.1%. Investors should be aware that the Fund launched in a difficult economic and market environment, during which inflation significantly increased. We note that the Fund will need to achieve strong positive returns above inflation over the next 4 years to achieve this target.

The Fund has satisfied its Environmental, Social and Governance ("ESG") commitments. It has also been rated ‘high’ and categorised as AA by MSCI, a leading independent index provider.

When compared to the ARC Sterling Steady Growth ACI, (which is used to compare the Fund’s performance to other similar funds) it performed better than the average manager who returned -0.5% over the same period.

*Data is cumulative returns running from the Fund’s launch date (16.05.22) to 30.04.23*

### Conclusion

The Fund launched in May 2022, and we conclude it is too soon to assess your Fund’s performance against the recommended holding period of 5 years. We have therefore provided you with an overview of the Fund’s performance so far.

The Fund’s target is to achieve inflation (measured by CPI) +3% which equates to 10.8% over the period since the Fund launched. It is currently tracking behind this with returns of 2.5%. Investors should be aware that the Fund launched in a difficult economic and market environment, during which inflation significantly increased. We note that the Fund will need to achieve strong positive returns above inflation over the next 4 years to achieve this target.

The Fund has satisfied its Environmental, Social and Governance (“ESG”) commitments. Its ESG credentials have also been rated ‘high’ and categorised as AA by MSCI, a leading independent index provider.

When compared to the ARC Sterling Steady Growth ACI, (which is used to compare the Fund’s performance to other similar funds) it performed better than the average manager who returned -0.5% over the same period.
Important Information

Capital is at risk. Past performance is not a guide to the future performance. Investments can go down as well as up and investors may not get back the amount originally invested. This can be as a result of market movements and exchange rates between currencies.

The Fund has an ESG focus which may limit or exclude the Fund’s exposure to companies, industries, or sectors as part of the Investment Manager's responsible investment selection process. This may impact the Fund’s investment performance compared to other funds and may differ from an investor's own view of responsible ESG selection.

The Fund invests in real estate investment trusts (REITs) and other companies or funds engaged in property investment, which involve risks above those associated with investing directly in property. In particular, REITs may be subject to less strict regulation than the Fund itself and may experience greater volatility than their underlying assets.

The Fund may be vulnerable to factors that particularly affect the infrastructure sector, for example natural disasters, operational disruption and national and local environmental laws.

The insolvency of any institution providing services, such as safekeeping of assets or holding investments with returns linked to financial contracts (known as derivatives), may expose the Fund to financial loss.

The Fund may enter into various financial contracts (known as derivatives) in an attempt to protect the value of the Fund’s assets or to reduce the costs of investing, although this may not be achieved.

The Funds will be exposed to stock markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.

The Funds have exposure to bonds, the prices of which will be impacted by factors including; changes in interest rates, inflation expectations and perceived credit quality.

When interest rates rise, bond values generally fall. This risk is generally greater for longer term bonds and for bonds with perceived lower credit quality.

The Funds invest in other currencies. Changes in exchange rates will therefore affect the value of your investment.

Inflation will, over time, reduce the value of your investments in real terms. This is especially true at times of high inflation. You should consider the impact of inflation when reviewing your investments.

In certain market conditions some assets may be less predictable than usual. This may make it harder to sell at a desired price and/or in a timely manner.

In extreme market conditions redemptions in the underlying funds or each Fund may be deferred or suspended.

A more detailed description of the risks that apply to the Funds can be found in the prospectus.

You are required to read the Key Investor Information Document (KIID) before making an investment. The KIID and prospectus for all Funds are available free of charge at www.ifslfunds.com or by calling 0808 145 2500.
5. ACD costs in general

What have we considered?

We have considered each component of the ongoing charges figure (OCF). These are described below and investors can find a detailed breakdown of the actual amounts paid for each in the latest annual report and accounts.

The components are as follows:

- **Annual management charge**
  This is a percentage fee paid from the Funds to the AFM, Sponsor and Investment Manager.

- **Depositary fee**
  This is a percentage fee paid from the Funds to the Depositary.

- **Custody fee**
  This is a combination of a percentage fee and fixed, transaction-based fees paid from the Funds to the Custodian.

- **Audit fee**
  This is a fixed annual fee paid from the Funds to the Auditor.

- **Registrar Fee**
  This is a small fixed annual fee per shareholder account, paid to the AFM for maintaining the register of shareholders.

- **KIID update fee**
  This is a fixed annual fee paid to cover the cost of reviewing and updating the key investor information document (KIID) for each of the Funds.

- **FCA fees**
  This is a fixed annual fee paid to the FCA for its role as regulator of IFSL and the Funds.
Ongoing charges figures per fund

<table>
<thead>
<tr>
<th>Fund</th>
<th>Share Class</th>
<th>Ongoing Charges Figure (OCF)</th>
</tr>
</thead>
<tbody>
<tr>
<td>IFSL CAF ESG Cautious</td>
<td>A Class</td>
<td>0.73%</td>
</tr>
<tr>
<td>IFSL CAF ESG Growth</td>
<td>A Class</td>
<td>0.60%</td>
</tr>
<tr>
<td>IFSL CAF ESG Income and Growth</td>
<td>A Class</td>
<td>0.61%</td>
</tr>
</tbody>
</table>

The ongoing charge figures above are based on actual expenses for the year ending 30 April 2023. They cover all aspects of operating the Funds during the year, including the fees paid and described at the start of this section 5. It does not include payments to your financial adviser and/or any other firm through which you invest. You pay for their services directly.

Conclusion

We are satisfied that the costs of the services provided represent reasonable value for investors in the Funds.
6. Comparable market rates

Periodically we review the fees we pay to third parties.

The comparable market rates for depositories, custodians and auditors are subject to a degree of commercial confidentiality. Nevertheless experience of past fees, the tender or review processes we use and our own awareness of the market mean that we believe our approach secures the best value for money when these contracts are reviewed or re-tendered; and that we review and re-tender with a reasonable frequency given the nature of the relationships and different costs of moving suppliers.

Depositaries commonly structure their fees on an ad-valorem basis, which means fees are based on the size of the fund. We keep these fees under review to ensure that they remain competitive and that they represent good value for investors.

We have considered the fees which are paid to the Investment Manager and Sponsor against those of similar services provided to other funds for which we are AFM.

The market rates for independent AFMs are also subject to a degree of commercial confidentiality and will vary depending on the size and type of fund. Contracts are commercially negotiated and reflect the competitive nature of the independent AFM market. Fund sponsors typically conduct full tendering processes and can move the Funds to other independent AFMs. This ensures that IFSL remains competitive and offers value for investors.

In making our assessment of the overall costs, we have also compared the OCF for the Funds with other similar funds in the market.

Conclusion

We are satisfied that the fees are reasonable having regard to the factors above.

7. Comparable services

With regard to AFM services, IFSL provides comparable services to other fund ranges.

While the charging structure will vary depending on the size, nature and risks involved with particular funds, the fees paid by these Funds are similar to those paid by other comparable funds within our range.

We also consider comparable services offered by the third party providers to the Funds, such as the Investment Manager. Where providers do offer comparable services we ask them to outline the key differences in charging and service, so that we can ensure good value is delivered to fund investors when compared against alternative products and services available elsewhere from the same provider.

Conclusion

We are satisfied that the costs of the Funds are reasonable and appropriate having regard to the factors above.
8. Economies of scale

What have we considered?

We have considered two different types of economies of scale relating to:

The size and scale of the funds

Larger funds are more profitable to us, in some cases we are charging a minimum fee to a fund until it grows in size. Certain services have fixed or minimum fees. This means that as funds grow they benefit from their increase in scale as the effect of those fees on costs and charges reduces. We seek to ensure that each fund offers value to investors and is commercially viable in its own right taking in to account the impact of any fixed or minimum fees.

The size and scale of IFSL as AFM

The second area of economies of scale is where we can negotiate terms for the large number of different funds for which we act as AFM. IFSL is AFM to over 70 funds with more than £10 billion under management. We use this scale to negotiate fees wherever we think it is in the interests of all the funds affected. We discuss with our suppliers the need to ensure that fees are fairly and transparently spread across all the funds.

Depositary relationships are negotiated across multiple funds to achieve the best possible rates. IFSL negotiate Depositary fees on an appropriate sliding scale, with lower percentage fees applying as the Funds reach certain thresholds, ensuring economies of scale apply directly to the benefit of these Funds and the investors.

Conclusion

We are satisfied that economies of scale are being passed onto investors in the Funds where these are being achieved.
9. Share classes

Each of the IFSL CAF ESG Funds has a single share class so there are no different features between share classes to consider under this section.

10. Our conclusion

We are satisfied that the charges taken from Funds are justified in the context of the overall value delivered to investors.
