

TARGET MARKET AND DISTRIBUTION

Mazarin Adventurous Fund

Product

The product is a non-complex, FCA authorised non-UCITs fund. The Fund is actively managed.

The aim of the Fund is to provide capital growth, over a minimum of 5 years.

The Fund aims to have an average yearly volatility (a measure of the size of short-term changes in the value of an investment), below 15% per year, over any 5-year period. This may limit the potential for capital growth.

There is no guarantee that the Fund will meet its investment objective or volatility target and investors may not get back the amount invested.

At least 70% of the Fund's assets will be invested in other collective investment schemes, closed ended funds and exchange traded funds, collectively known as 'Investment Funds'. This could include other Investment Funds managed by the same Authorised Corporate Director and/or Investment Manager.

The Fund will invest in a range of different asset classes, across different regions and industries. Chosen investments are based on predicted volatility within asset classes and global markets, using information and research provided by an independent asset allocator. The asset class exposure is likely to include higher risk investments including shares in companies and real assets, for example property and commodities (e.g. gold and oil). The Fund will typically have lower exposure to lower-risk investments such as government and corporate bonds (both investment grade and sub-investment grade), derivatives, money market funds and cash.

In addition to the above, the Investment Funds may also hold other permitted investments such as money market instruments and structured products which are a type of fixed-term investment where the amount you earn depends on the performance of a specific market or a specific asset. The Fund may also invest directly in bonds issued by companies, shares in companies, and structured products.

Target Market

The type of client to whom the product is targeted

As a non-complex fund it is targeted at retail investors, professional investors, and eligible counterparties.

Clients' knowledge and experience

This fund is suitable for the basic investor. Investment experience is not a necessity however a basic understanding of the kind of underlying investments of the scheme is important. It has no complex features or guarantees in place that would require more than a basic understanding of investment markets or instruments. Investors should read the Key Investor Information document which is intended to help investors understand the nature and risk of investing in this fund.

Investors are also advised to read the fund's prospectus which contains details on the objectives, investment strategies, risk, distribution policy, fees, expenses, and Fund Management.

Clients' financial situation, with a focus on the ability to bear losses

Clients should be prepared to commit to their investment for the long term or risk losing part of their investment in the short to medium term. The minimum investment horizon should be greater than five years.

Investors will have no risk of loss greater than their invested amount. As a fund with exposure to financial instruments investors should be aware that the potential exists for a total loss of assets and should therefore be able to bear such losses. However, the fund will be managed in such a way to reduce this risk considerably.

Clients' risk tolerance and compatibility of the risk/reward profile of the product with the target market

This Fund has been measured as 5 because its investments have experienced moderate to high volatility in the past. The Fund's volatility is affected by various risks.

The Fund is therefore compatible with clients who have a higher than medium risk tolerance.

Perceptions of risk will vary from person to person. The risk tolerance identified here refers to a fund which invests in such a way as to maintain moderate to high volatility. It will not take significant positions in individual financial instruments or invest in highly speculative assets.

Clients' objectives and needs

The client's objectives should be in line with the Fund's investment objective, which is to generate capital growth over the longer term (5 years +) by gaining exposure to a balanced mix of assets.

Clients who should not invest (the 'negative-target market')

The Fund may not be suitable for certain investors, including but not limited to those whose objectives and needs are not consistent with the nature of the Fund, those who are unable to commit capital for a sufficient term or do not have sufficient resources to bear any loss which may result from an investment in the Fund. The Fund is also not committed to meeting any specific ethical, social, religious, or environmental restrictions which some investors may be seeking.

Distribution channel

The Fund will be distributed primarily via fund platforms, wealth managers, discretionary fund managers and financial institutions.
